Islamic Azad University  
Central Tehran Branch

Dear Madam/Sir,

I am writing this reference letter at the request of Mr. **Name** who is applying for master program.

I was **Name**'s instructor for "Operating system" and "Language and automata theory" courses, and he has proven to be exceptional in several aspects. Elements of my Operating systems course are: general concepts (Definition, aims, and types), definition of process & threads and their life cycles, scheduling, concurrency (mutual exclusion, synchronization, starvation, deadlock, semaphores and monitors) and memory management (simple and virtual) and some techniques (paging, segmentation and partitioning) and elements of my Language and automata theory course are: types of languages, grammar (Chomsky classification), machines and automata.

**Name** is exceptionally intelligent. He proved to be a very quick study, learning the elements of course. Furthermore, his questions are always thoughtful and penetrating. Mohammad threw himself into his assigned researches wholeheartedly, and shows every sign of having real talent in computer science and it was a joy to have him in the class. He understands the value of goal setting and the importance of team work.

All in all, I believe **Name** has a very bright future, and given his great intelligence, I am sure that he could put his degree to good use.

In short, I give **Name** my highest recommendation, and very much hope that the committee judges his application favorably. Please do not hesitate to contact me if there is any a question or concern.

Sincerely,

**Name**  
Assistant Professor,  
Computer Engineering Department,  
Azad University, Tehran Central Branch
